DETAILED ACTION

Allowable Subject Matter

Claims 1-3 are allowed.

The following is an examiner's statement of reasons for allowance: regarding independent claim 1, the prior art fails to teach or fairly suggest, in addition to the accompanying features of the claims, a polarized wave splitter comprising a waveguide having a cross section suitable for letting at least two different polarizations propagate, a first and second slot, a first and second transition region, a first and second waveguide filter, wherein the overall dimensions of the various components are such that the transfer characteristics of the splitter, within a transmit band and within a receive band, measured, on the one hand, between the common input/output and the first individual input/output and, on the other hand, between the common input/output and the second individual input/output, are better than the characteristics resulting from the sum of the characteristics of the components constituting the splitter, within the said bands. Claims 2-3 are allowable by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
